

INTRODUCING 3 NEW WAYS TO SHARE DOCUMENTS & DATA IN REALTIWEB!

NEW! RealtiWeb sharing features

RealtiWeb now gives three new ways to share documents and information with clients and other legal professionals! These exciting new features greatly improve your ability to collaborate with others on your files.

Post Documents - Allows you to post your merged documents for online retrieval by the other side's law firm (at no charge). You're also able to track your postings and retrievals in real time!

Share Information - You now have the ability to share common deal data (Basic, Purchaser, Vendor, and more) with the other side. If they're also using RealtiWeb, they can use this data to populate (or cross-check) their own files.

Email Anyone - RealtiWeb's advanced, built-in email allows you to send messages (+ attachments) to anyone associated with your file - including clients, brokers, etc.

These new features can be easily accessed via the RealtiWeb documents screen.

Need help with these new sharing features?
